

PowerEdge Lithium Polymer Batteries releases new 160 mAh 1S battery for Micro Indoor Aircraft

Tampa, FL., February 7, 2010 – PowerEdge Lithium Products, LLC, a leader in lithium polymer battery development for Radio Controlled (R/C) industry, today released the PowerEdge 160 mAh single cell (1S) battery for micro indoor aircraft.

“Incredible”, said Evan Chapkis, President of RC Accessory, Inc. “I have been flying this new battery for several months in the ParkZone Sukhoi and for the past several weeks in the just released E-Flite Micro 4-Site indoor aircraft. The power of this new battery is amazing and the long flight times add to the excitement.”

The new PowerEdge 160 mAh battery is available in a 2-pack and has a MSRP of \$17.95. Available direct from RC Accessory, Inc (www.rcaccessory.com) or your local hobby shop.

About PowerEdge Lithium Products, LLC

PowerEdge Lithium Products, LLC serves the R/C community worldwide with high density lithium polymer batteries that are used in R/C aircraft, cars, and boats. PowerEdge Lithium Products, LLC offers a wide variety of lithium polymer batteries in various configurations to support the novice through national and world champions, with the best warranty in the R/C lithium battery market.
